

XL1

Next Generation,
Ultra High-Capacity
Water Tower

Experience Instant Chilling, High-Capacity, and Smart Features

Unmatched Capacity & Cooling:

With the largest cold tank on the market, the XL1 offers instant, ice-cold water, powered by patented cold recirculation technology to meet high-demand needs.

Smart & Intuitive

The XL1 adapts to your routine, ensuring every dispense is ready just when you need it.

Innovative User Experience

The 15.4" full-color touchscreen offers customizable options for adjusting dispense speed and volume, tailored to your preferences.

Advanced purification

Advanced Purification: Ultra high-capacity, multi-stage filtration with mineral add-back reverse osmosis and dual in-tank LED UV lights ensure pure, fresh water all day.

Ultra High-Capacity Filtration

20,000-gallon filters, dual RO high consumption with booster pump

Electronic Leak Detection

Built-in leak stop for added safety

Advanced Diagnostics

Track filter life, usage, and service needs

Key Features & Specifications

Key Features

- Hyper chill – fully wrapped tank for instant chilling
- Extra Large Dispense Area: 14.68 inches
- Fast Dispense Rate: 4 liters per minute
- User Interface: 15.4-inch full-color touch display, fully customizable with dispense speed options
- Ultra Clean: Two in-tank LED UV lights to maintain cleanliness
- Patented Cold Recirculation: Ensures every cup of water is ice-cold
- Energy Efficient: ECO mode for energy saving
- Long Life Filters
- Microprocessor: Calculates service warnings, filter life, and usage
- Leak Detection: Equipped with electronic leak stop

Specifications:

Water Options: Cold, Ambient, and Hot Water

Tank Capacity:

Cold: 5 gallons, fully wrapped for instant chilling

Ambient: 2.5 gallons

Hot: 1.1 gallon

Dimensions: H: 68.5" x W: 18.89" x D: 20.4"

Electrical specs: 15V, 60Hz, 5.4A

Certifications:

UL399, CSA CAN C22.2 No. 120-13, NSF-372, NSF-61, NSF-42, CSA B483.1-2007
